

## **Assignment topics on "main trends to Climate litigation, Human rights in climate litigation and Strategic Climate change litigation"**

### **1. Evolution of Climate Litigation**

**Topic:** Trace the history and evolution of climate litigation globally.

**Key Points:** Overview of seminal cases, landmark judgments, and their impact on national or international climate policies.

**Objective:** To understand how climate litigation has evolved and its impact on shaping environmental law and policy.

### **2. Human Rights and Climate Litigation**

**Topic:** Analyze the integration of human rights arguments in climate litigation cases.

**Key Points:** Discuss cases where human rights have been a central argument, the outcomes of such cases, and their broader implications for environmental justice.

**Objective:** To explore the intersection between human rights and environmental law through the lens of climate litigation.

### **3. Strategic Climate Litigation Against Fossil Fuel Companies**

**Topic:** Examine cases of strategic litigation directed at fossil fuel companies.

**Key Points:** Analysis of legal strategies used, the role of scientific evidence in litigation, and the outcomes and repercussions of these cases.

**Objective:** To assess the effectiveness and consequences of strategic climate litigation in holding fossil fuel companies accountable.

### **4. Role of NGOs in Climate Litigation**

**Topic:** Investigate the role of non-governmental organizations (NGOs) in initiating and supporting climate litigation.

**Key Points:** Case studies of NGO-led lawsuits, the resources and networks involved, and the impact of these actions.

**Objective:** To understand how NGOs are using legal tools to advance climate action and policy changes.

### **5. Climate Litigation as a Tool for Policy Change**

**Topic:** Evaluate climate litigation as a tool for influencing or forcing policy change.

**Key Points:** Discussion of successful cases where litigation has led to significant policy shifts, analysis of the legal and societal implications.

**Objective:** To critically analyze the effectiveness of litigation as a mechanism for achieving sustainable policy change in the realm of climate governance.

## 6. Comparative Analysis of Climate Litigation in Different Jurisdictions

Topic: Compare and contrast climate litigation strategies and outcomes in different legal systems.

Key Points: Examination of how different jurisdictions handle climate litigation, including variations in legal frameworks, the role of courts, and public reception.

Objective: To explore how varying legal and cultural contexts influence the process and success of climate litigation.

## 7. Youth and Climate Litigation

Topic: Focus on the rising trend of youth-initiated climate lawsuits.

Key Points: Profile significant cases brought by youth, motivations behind these lawsuits, legal arguments used, and their outcomes.

Objective: To highlight the role of youth activism in climate litigation and its potential long-term impacts on climate policy.

## 8. Future Trends in Climate Litigation

Topic: Speculate on future trends in climate litigation.

Key Points: Emerging themes, potential new targets of litigation, and predictions on how these trends will influence global climate action.

Objective: To forecast the evolution of climate litigation and its possible impacts on future climate governance.
