

Case study analysis:

How do we know when an environmental policy is efficient?

Write an argument analysis of 500 words.

Choose one of the below case studies to analyse:

1. Germany's Energiewende:

Germany's Energiewende, or energy transition, is a comprehensive strategy to shift from fossil fuels to renewable energy. The country invested heavily in wind and solar power, implemented energy efficiency measures, and established policies to promote a decentralized and sustainable energy system. Germany has made significant progress in reducing greenhouse gas emissions and increasing the share of renewable energy in its energy mix.

2. The Green Belt Project in Kenya:

The Green Belt Movement, founded by Nobel laureate Wangari Maathai, aimed to address deforestation and empower women in Kenya. The initiative involved planting trees to combat soil erosion, provide firewood, and create employment for women. Beyond environmental benefits, the project contributed to women's empowerment and community development.

3. Curitiba, Brazil - Sustainable Urban Planning:

Curitiba is often cited for its innovative and sustainable urban planning. The city invested in an efficient public transportation system, including dedicated bus lanes, to reduce traffic congestion and air pollution. The integration of green spaces, waste recycling programs, and affordable housing initiatives further contributed to the city's reputation for sustainable urban development.
